## 1 Research what restrictions are in place at your destination:

- If traveling outside of Europe, use the State Departments' COVID-19 Country Specific Information page for guidance: <https://travel.state.gov/content/travel/en/traveladvisories/COVID-19-Country-Specific-Information.html>
- If traveling within Europe, use the Reopen Europa website <https://reopen.europa.eu/en>
  1. Use the Travel Plan tool to see what travel requirements your destination has in place.
  2. Use the Travel Plan tool to see what requirements Germany has when returning from your destination.

## 2 For planning your return to Germany, use this RKI report to determine how your leisure travel destination is categorized. Testing and quarantine requirements are based on if an area is categorized as a "new variant area," "high incidence area," "risk area," or "non-risk area."

- [https://www.rki.de/DE/Content/InfAZ/N/Neuartiges\\_Coronavirus/Risikogebiete\\_neu.html](https://www.rki.de/DE/Content/InfAZ/N/Neuartiges_Coronavirus/Risikogebiete_neu.html)
- Travelers who have been in a 'new variant,' 'high incidence,' or 'risk' area within 10 days before entry must undergo a 10-day quarantine after arrival in Germany. For USAG Wiesbaden community members, testing out of ROM after 5 days is not possible.
- Travelers who have been in a 'new variant' or 'high incidence' area in the past 10 days are obliged to provide proof (negative test result or corresponding medical certificate), upon entry. This test must have been carried out at the earliest 48 hours before entry. If travelling by a carrier, proof must also be presented to the carrier before departure.
